

Our Products

Start-Up Burners

We would like to introduce our start-up burner for use with coal burners. The start-up burner comprises a pneumatically retractable atomised oil burner lance that is installed directly in the coal burner

DESCRIPTION / FUNCTION:

The start-up burner comprises:

- centre plate
- oil lance with pneumatic actuator
- ignitor lance
- heat resistant diffuser mounted on carrier tube
- flame viewing head detector
- oil, (steam) and cooling air connections
